## Autumn Term 2016

This term our focus is waste. We are going to introduce a new system for school lunches, so that people eat more and throw away less. At the beginning of each week you will get a list of dinners for each day and you have to choose what you want then so the cooks can only cook the amount of food needed. Soon, we are going to go to another school to see how this system works.

This year we want to sponsor two endangered animals. We are thinking of sponsoring an elephant and continuing to sponsor our snow leopard. The sponsor packs includes: An adorable cuddly toy of the sponsored animal we chose and an information pack about their life.

As you know, this term we have drawn our focus to waste. We will hold an assembly, where we will explain the importance of creating less waste. We will be telling everyone to try and cut down their waste.

Also, soon, we (the ECO ambassadors) are going on an Eco training day. We hope to learn lots about being Eco to bring back to Maple.

We hope you enjoyed reading this and we look forward to the upcoming events. We hope this term will be a big success.

Charlotte and Edith, the Eco Ambassadors xxx
